

## WKE DS14 parameter description

This model pump is suitable for large area agricultural irrigation. Applying drip irrigation and sprinkling irrigation methods, one set of this pump can irrigate 133.200 m<sup>2</sup>. Stable & correct running system, automatic maintenance, convenient usage, unnecessary supervised after installation, no more extra charge.

### In the kit

Photovoltaic modules - Water pump - controller  
 Inverter - cabinet - electrical tape - water-proof  
 electrical tape - air switch - water level sensor  
 hanging rope - rope buckle - cables - MC4  
 Connector

### Model: WKEDS1420

Power (w)	2500	Peak Flow (M <sup>3</sup> /H)	20
Inverter	5000	Lift (M)	20

Photovoltaic modules: 10 x 250Wp Poly in series

### Model: WKEDS1425

Power (w)	2700	Peak Flow (M <sup>3</sup> /H)	20
Inverter	5000	Lift (M)	25

Photovoltaic modules: 11 x 250Wp Poly in series

**Other power on request**
